MUHAMMAD ABDULLAH

React Developer

As a React.js developer, I focus on crafting dynamic, responsive web applications that enhance user experiences. With a robust background in JavaScript and front-end technologies, I excel in building scalable solutions using React, including component-based architecture, Redux for state management, and RESTful API integration. I stay updated on industry trends to ensure top-notch code quality and innovative problem-solving. My strong collaboration and communication skills enable me to drive projects forward effectively while prioritizing user-centric design.

11/2020 - 09/2024   *Lahore,Pakistan*

SKILLS

`HTML` `CSS` `Java Script` `React` `APIs`

`c/c++/c#` `Creativity` `Problem-Solving`

`Technical Knowledge` `MS Office`

PERSONAL PROJECTS

AI Chatbot

- I design the frontend for our project by using html, tailwind and java scriptLed the design and development of an AI chatbot using natural language processing (NLP) techniques and machine learning algorithms, resulting in a functional prototype capable of handling user queries and providing relevant responses with 90% accuracy.

Food Ordering

- Browse through different menus and deals along ratesThe user selects the meal he wants to order by clicking on itThe system adds the meal to the cart and ask user to "continue order" or "select another meal"The user selects the option as requiredIf the user selects "delivery", the system shows the rider details and delivery time.
